

Cornell University
Stem Cell Program

2nd Annual Stem Cell Symposium

Saturday, September 26, 2009

Alice Statler Auditorium

Ithaca, New York

Haifan Lin

Yale Stem Cell Center

Translational regulation of stem cell self-renewal

Andras Nagy

Samuel Lunenfeld Research Institute of Mount Sinai Hospital

Embryonic stem cells, induced pluripotent stem cells, and blood vessel formation

Martin Pera

Eli and Edythe Broad Center for Regenerative and Stem Cell Research

Embryonic, carcinoma, and induced human pluripotent stem cells

Steven Pruitt

Roswell Park Cancer Institute

Somatic stem cells, genome stability, cancer and aging

Beverly Torok-Storb

Fred Hutchinson Cancer Research Center

Regulation of hematopoiesis

Tudorita Tumbar

Cornell University Stem Cell Program

Regulation of proliferation in hair follicle stem cells

Organizers:

Tudorita Tumbar, Chair

Molecular Biology and Genetics

Alexander Nikitin

Biomedical Sciences

Steven Pruitt

Molecular and Cellular Biology

Robert Weiss

Biomedical Sciences

Online Registration:

June 1-September 1
